March 11, 2020

The Radiosurgery Society (RSS) Board of Directors and 2020 Scientific Planning Committee have been closely monitoring the events and circumstances surrounding the spread of the coronavirus-19 (COVID-19). After considering the concerns of our RSS community, the results of the recent RSS survey and the impact of restricted travel recommendations in place at multiple medical institutions and companies, the RSS Board has made the difficult decision **to cancel** the two pre-symposia: **Advancements in GRID/Lattice, Microbeam and FLASH Symposia** and **Immunology, Immunotherapy and Radiation Oncology Symposium** scheduled to take place April 1, 2020 in Washington DC.

The health, well-being and safety of our meeting attendees are of utmost importance and priority. As professionals in the healthcare field who work directly with cancer patients with compromised immune systems, and the elderly - often with multiple comorbidities, it is vital that our meeting attendees are not put at risk for contracting any illness.

This is an unprecedented time for all, but the RSS remains committed to meeting the needs of our membership and RSS community. Many of you have attended the annual RSS meetings over the past decade, hundreds of participants have been preparing presentations for this meeting, and have been eagerly awaiting our educational program including the latest technologies, scientific advancements and personally engaging with experts, old friends and new colleagues.

While we are addressing the unforeseen change in course and direction, the RSS BOD, Staff and Scientific Program Committees will not waiver on our commitment to provide the resources, education and support your needs to deliver the best care for your patients. The RSS is looking into alternate opportunities and virtual offerings for elements of the meeting.

More information will be forthcoming in a Frequently Asked Questions (FAQ) document that will be distributed to registered attendees. You can also find more information on the RSS website soon.

Thank you for your continued support and understanding.

Iris Gibbs, MD, FACR, FAAWR, FASTRO
President of the Board of Directors
The Radiosurgery Society

Shalom Kalnicki, MD, FASTRO, FACRO
Chairman of the Board of Directors
The Radiosurgery Society

Joanne Davis, PhD
Executive Director

"The Radiosurgery Society® is a multi-disciplinary non-profit organization, consisting of surgeons, radiation oncologists, physicists, and allied professionals, who are dedicated to advancing the science and clinical practice of SRS/SBRT and advancing therapies."
